

# Direct-Connect

(Pivot Used as an Example, Other Applications are available)

At Pivot Control panel contacts close when irrigating and open when not irrigating.

PIVOT

Direct-Connect is a simple, low cost solution to meet your mission-critical control needs. Direct-Connect has no central "brains" and relies on proven radio communication.

Motorola Direct-Connect radios are fully compatible to be used for communication with Motorola IRRInet™ or IRRIcomm™ for future upgrades.

If connection is lost due to power or connection problems, the pump will shut down immediately.

Contact Us today to learn more about Direct-Connect. [www.motorolairrigation.com/contact-us](http://www.motorolairrigation.com/contact-us)
